

Admissions & Enrollment

- Improve unenrolled student email verification
- simplify section enrollment by catching duplicate inputs
- fix the grade-level selection flow
- provide a table view of core documents accompanied by an admissions checklist (birth certificate, report card)

Academic & Grading Setup

- Remove semesters from the academic setup
- convert subjects to a dropdown option
- allow for the editing of weights in the grading schema
- improve lesson plan contents, and ensure the grading system strictly adheres to DepEd guidelines for FUMCES.

Resource & Schedule Configuration

- Create structured, table-based setups for Subjects (Description, Code, Grade Level, Time Period)
- Rooms (Name, Capacity)
- full Schedules (Subject, Teacher, Day, Time, Room)

System UI & Workflow

- Fix the login, user roles, text validation
- overall data workflows
- implement a proper sign-off process
- Rename "Economic Demographics" to a more professional, client-facing term

Financial Integration

- Incorporate PayMongo as the payment method
- verify tuition fee update
- properly reconcile student financial transactions with the total payments received by the system.
